

Installation Guide for ColorPage SF600 on Windows 7 64bit system

Step 1:

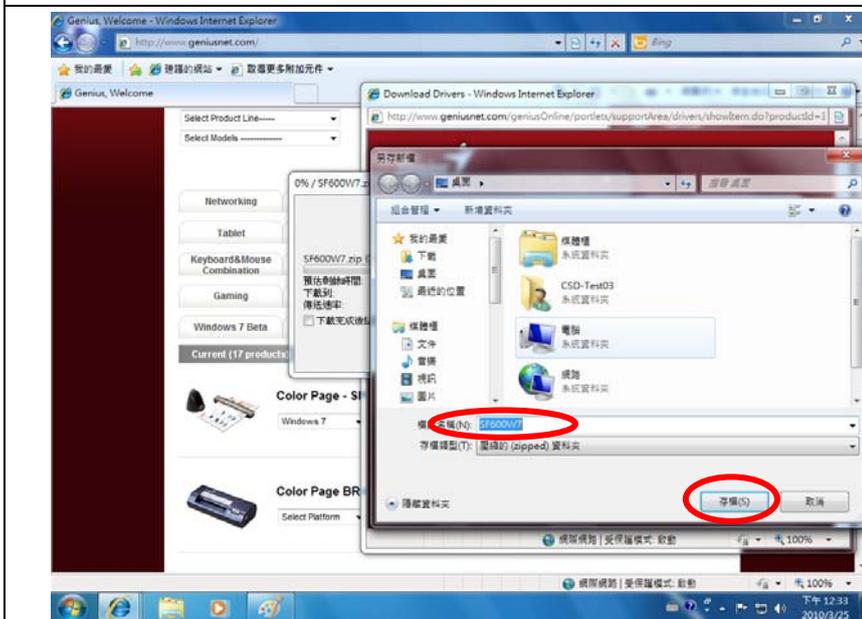

Before you install the product driver, please don't connect the scanner.

Please go to Genius website:

www.geniusnet.com

Find the Windows 7 driver for ColorPage SF600.

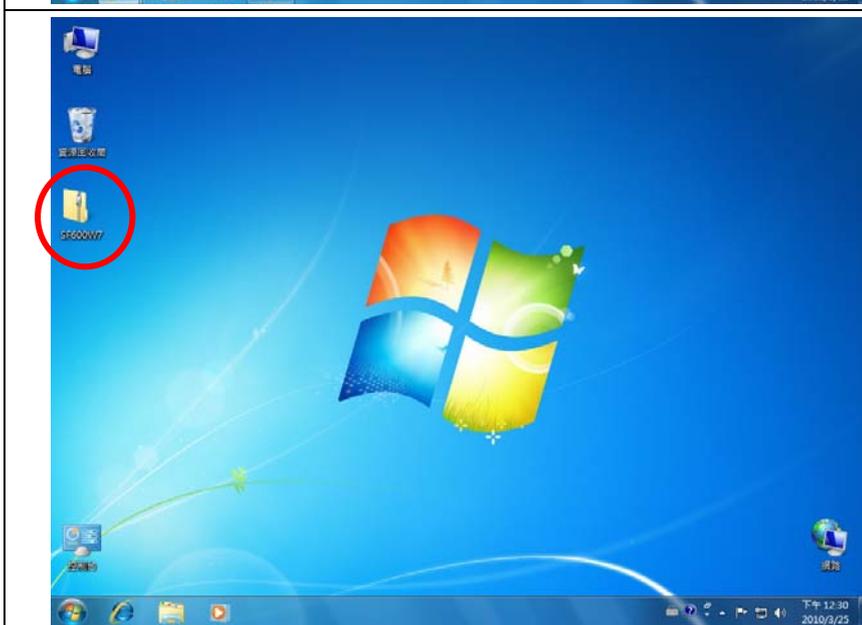

When you see the download page, please **right click** on the file name **“SF600W7.zip”** and choose **“Save As”**

Step 2:

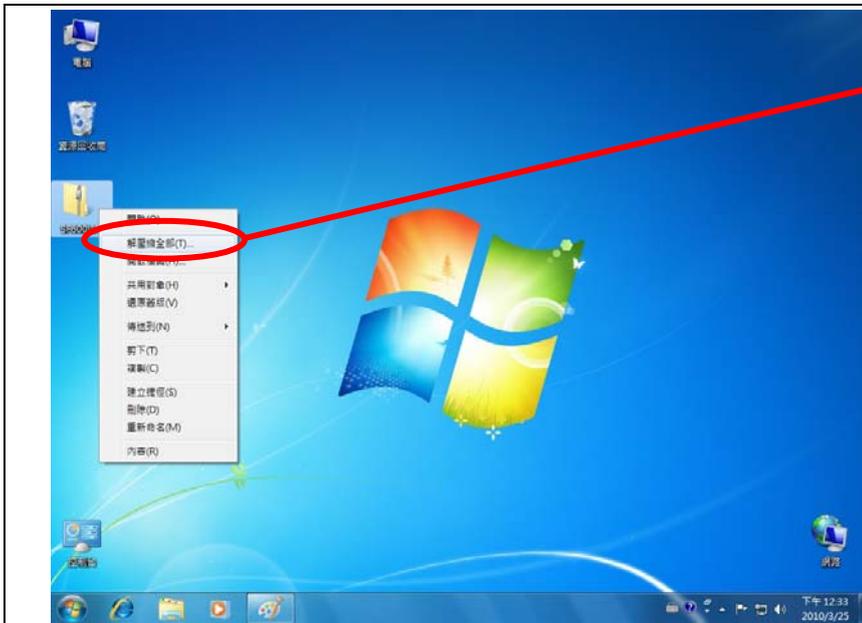

When your system ask the destination to save the file, please find one disk to save the file.

And, we suggest that you save the file on the desktop of your Windows 7.

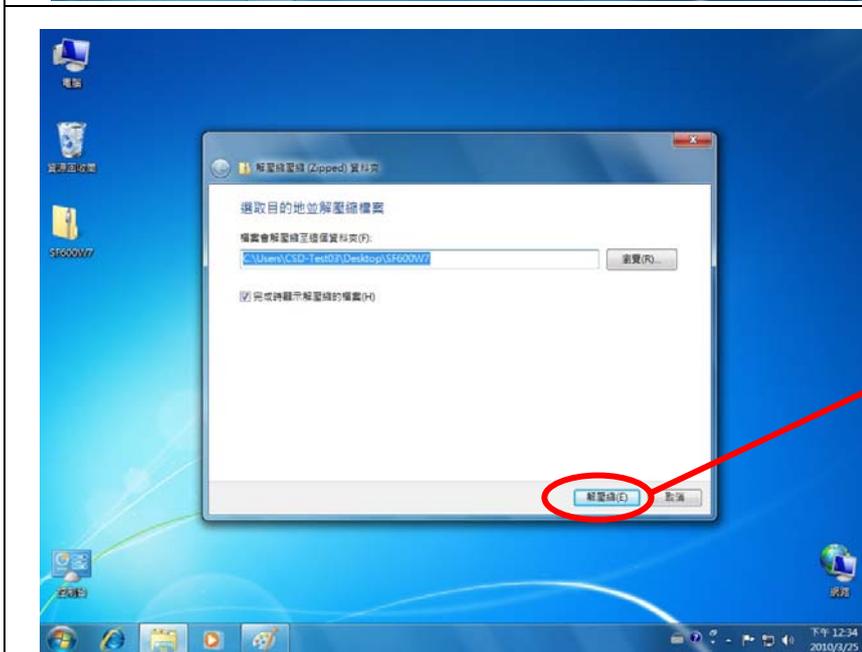

Step 3

After downloading the driver, you can see the file on your Windows desktop.

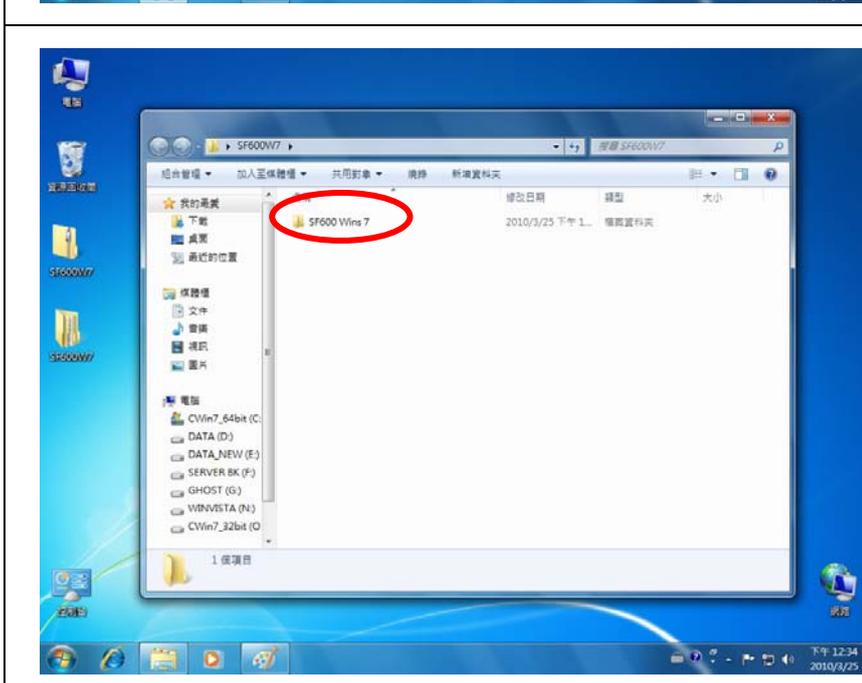

Step 4:
Right click on the [SF600W7.zip](#) on your Windows desktop and choose to unzip the file.

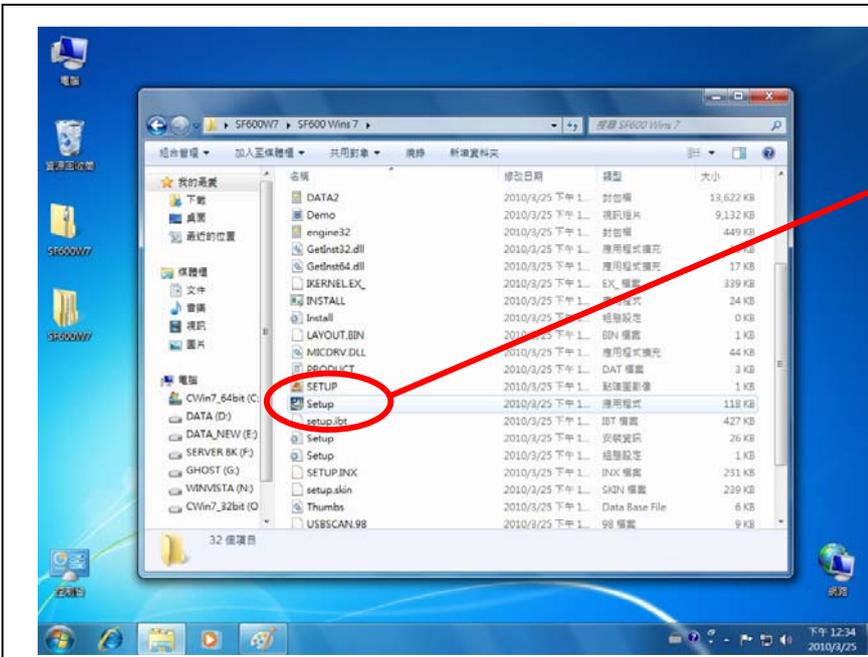

Step 5:
Your system will ask you the destination, you can assign one disk. But, we suggest that you use the default setting and save the folder on your Windows desktop.

Then, click on “Unzip” button.

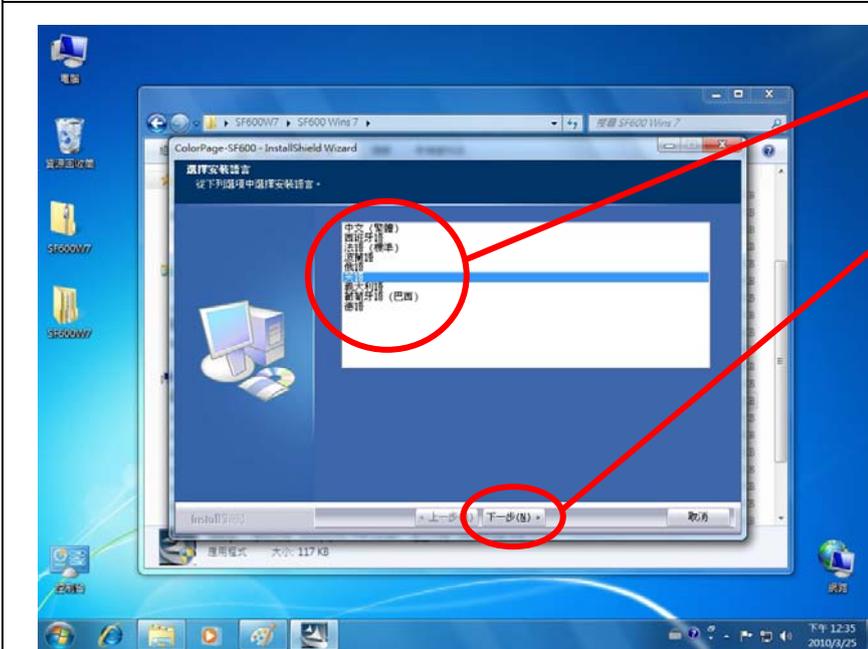

Step 6:
After unzipping the file, your system may auto open the folder. If not, please just click on the folder.

Step 7:

Please find the **Setup** in the folder.

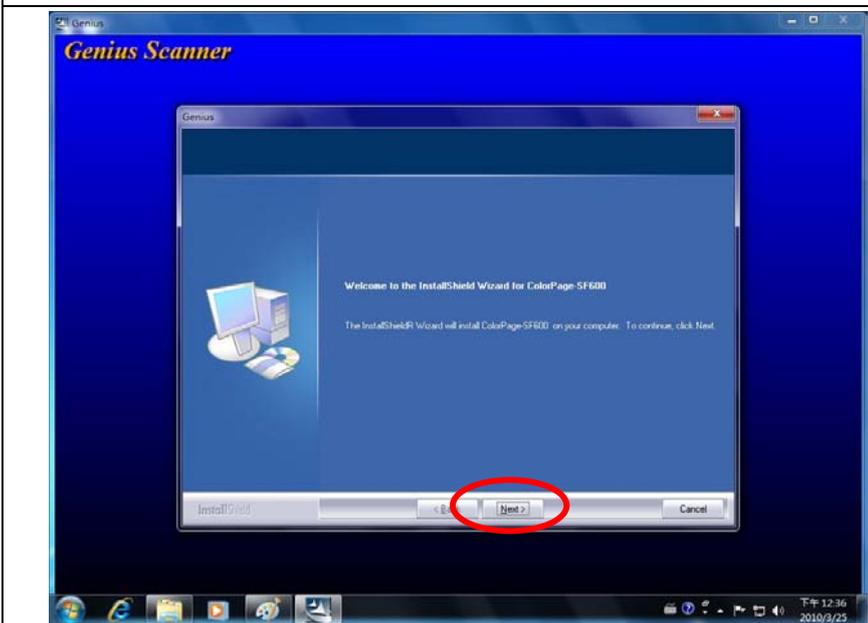

Double click on the Setup to start installing the driver to your Windows 7.

Step 8:

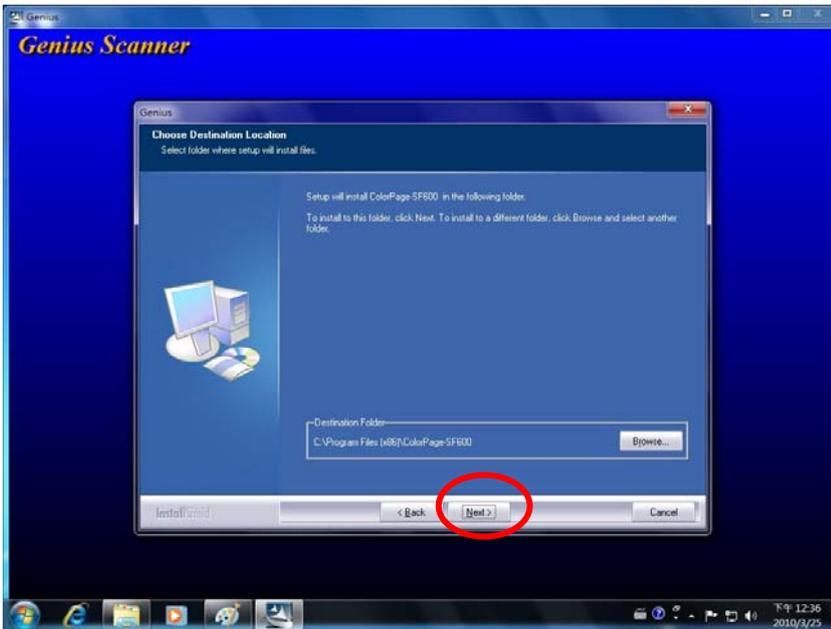

Please choose the language from the list.

Then, click on “Next”.

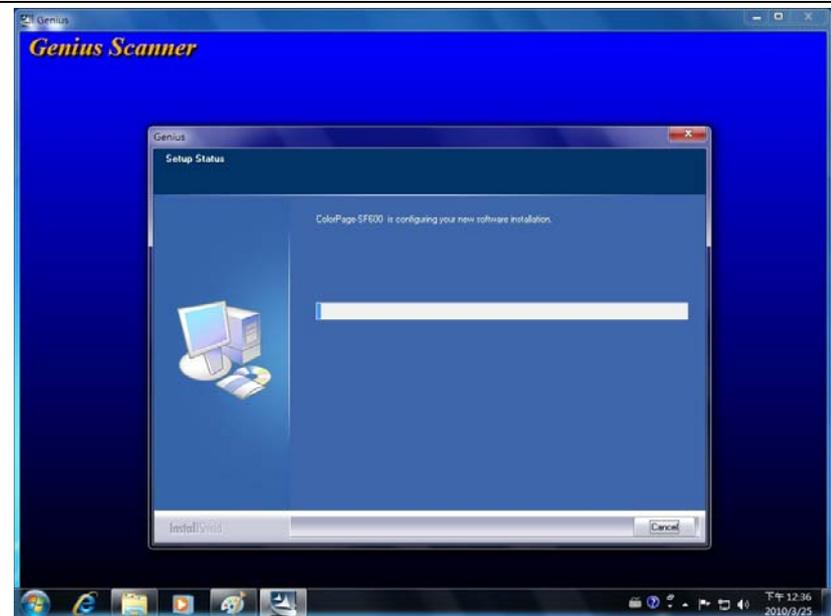

Step 9:

Please click on “Next” button again.

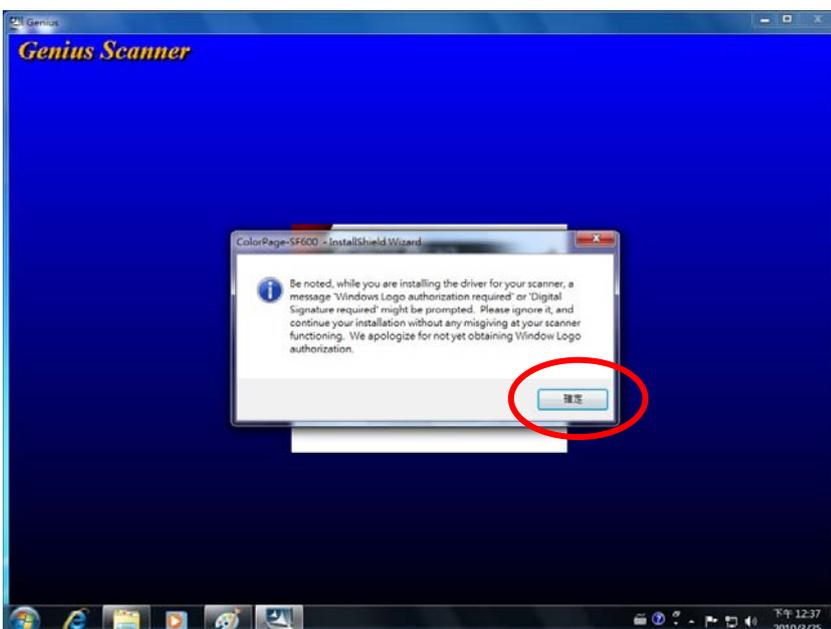

Step 10:

Please click on “Next” button again.

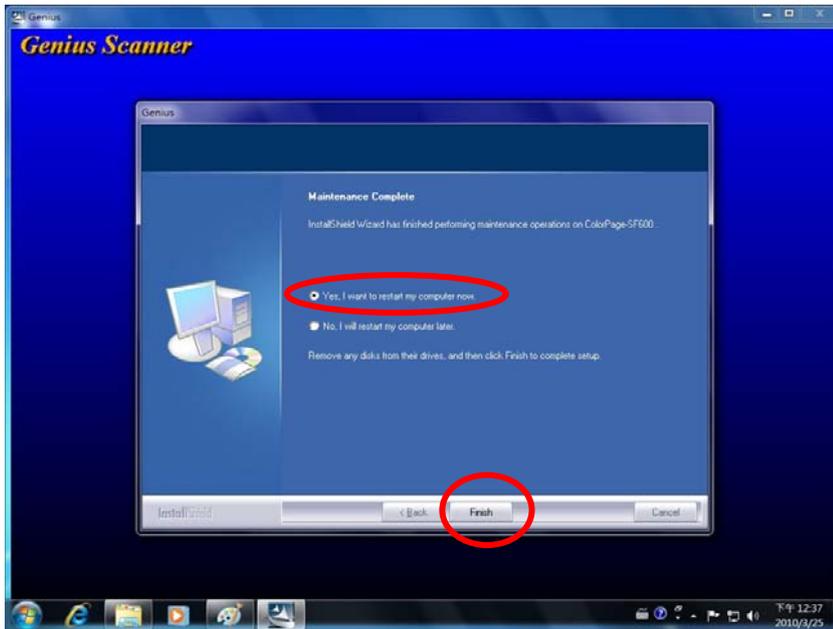

Step 11:

Wait for some more seconds to let your system install the driver.

Step 12:

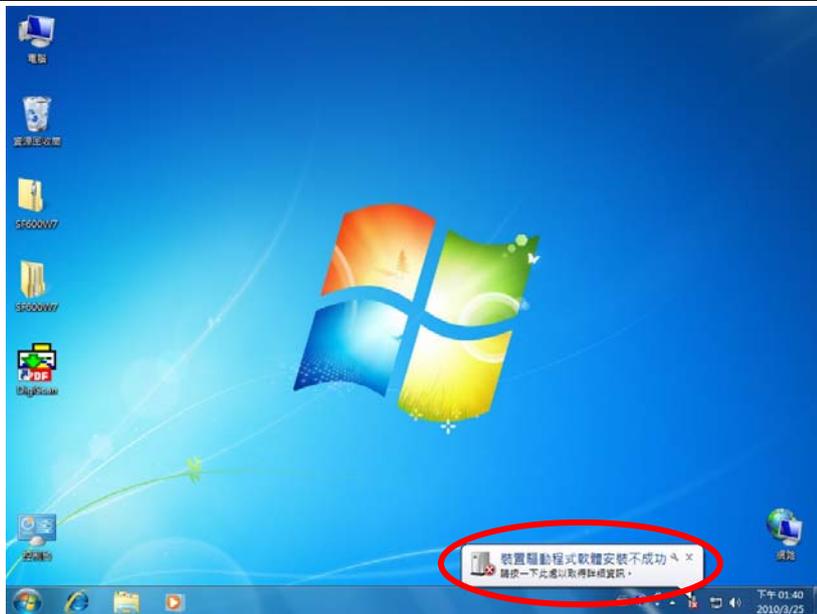

When you see this information, please just click on “Sure”.

Step 13:

After installing the driver, your system will ask if you will restart the system.

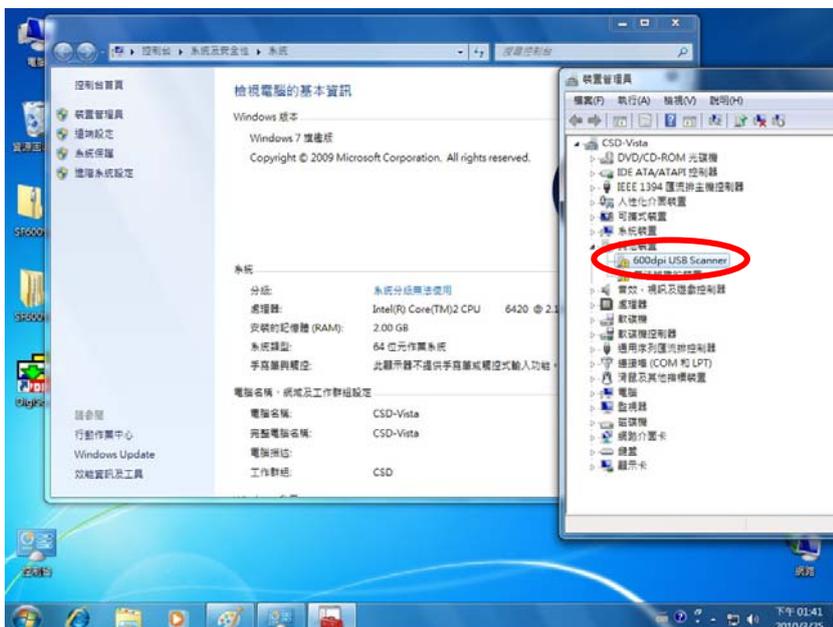

Please choose “**YES**” and then click on “**Finish**”.

Step 14:

After restarting your Windows, please connect the ColorPage SF600 to one USB port of your pc.

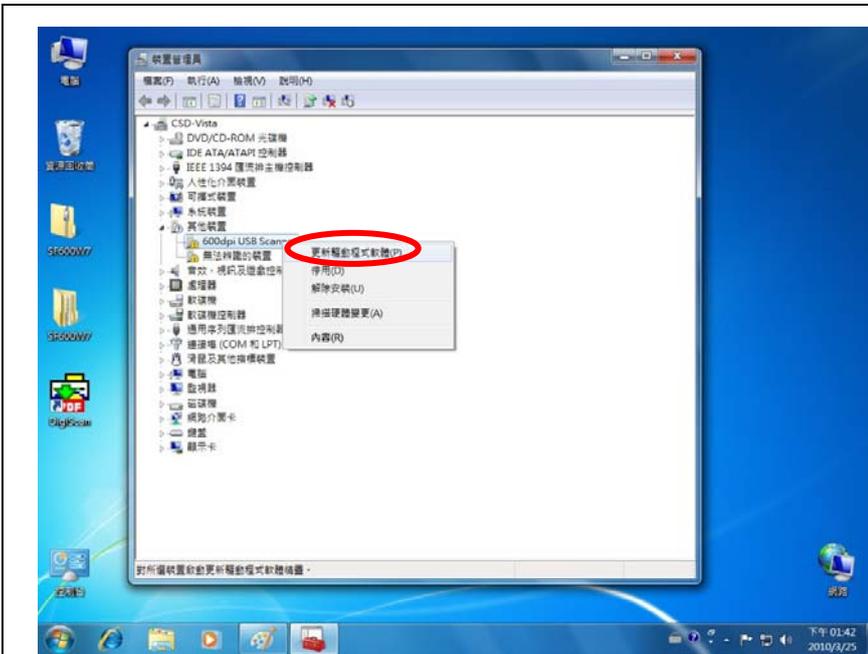

Then, your system may report that the driver of this device can't be installed.

Step 15:

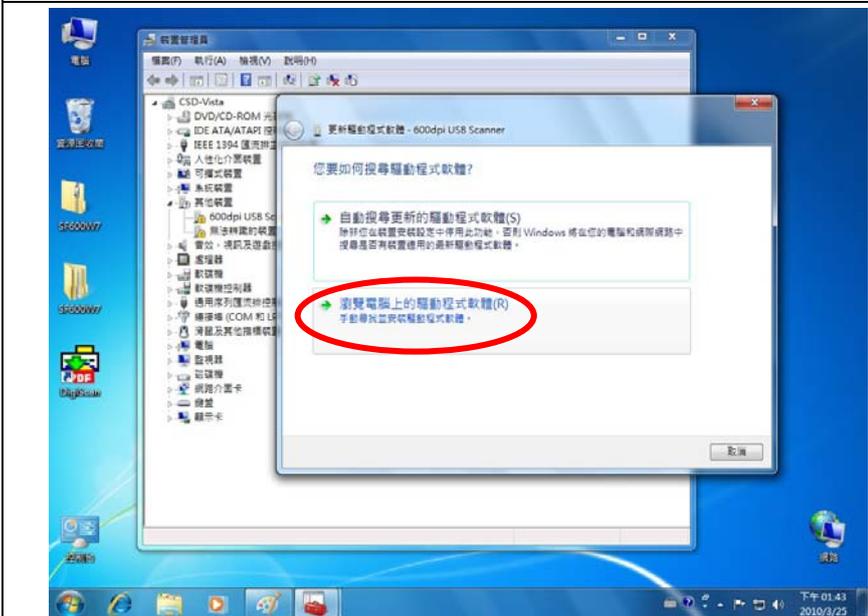

Then, please go to Control Panel/System to open the system **Device Manager**.

In Device Manager, you will find that one device named “**600dpi USB Scanner**” with a sign of “**!**”.

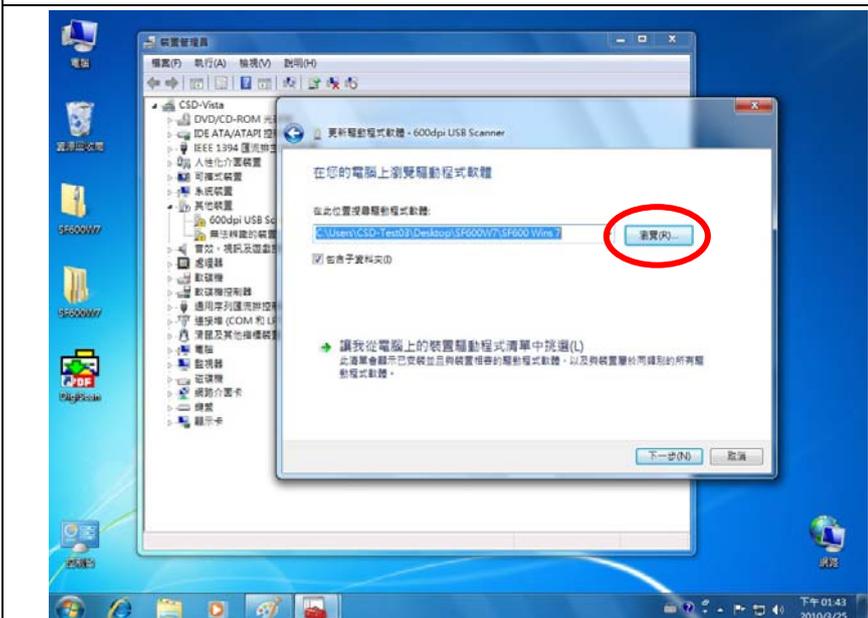

Step 16:

Please right click on the “600dpi USB Scanner” and choose “**refresh the driver**”.

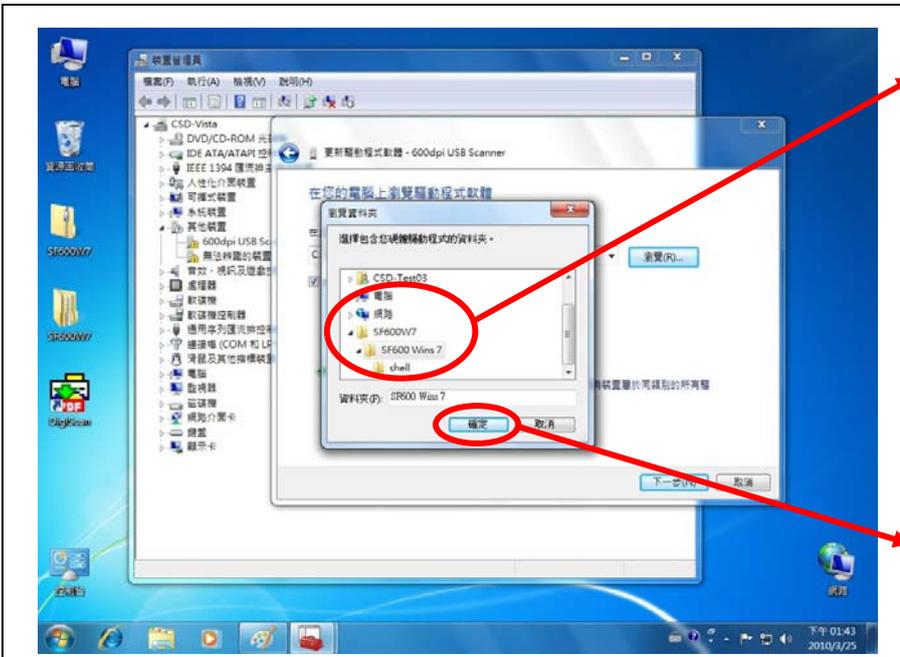

Step 17:

Your system will ask you where to get the driver.
Please don't let your system search the driver and manually assign the folder of driver location.

Step 18:

Please click on “**Browse**” button.

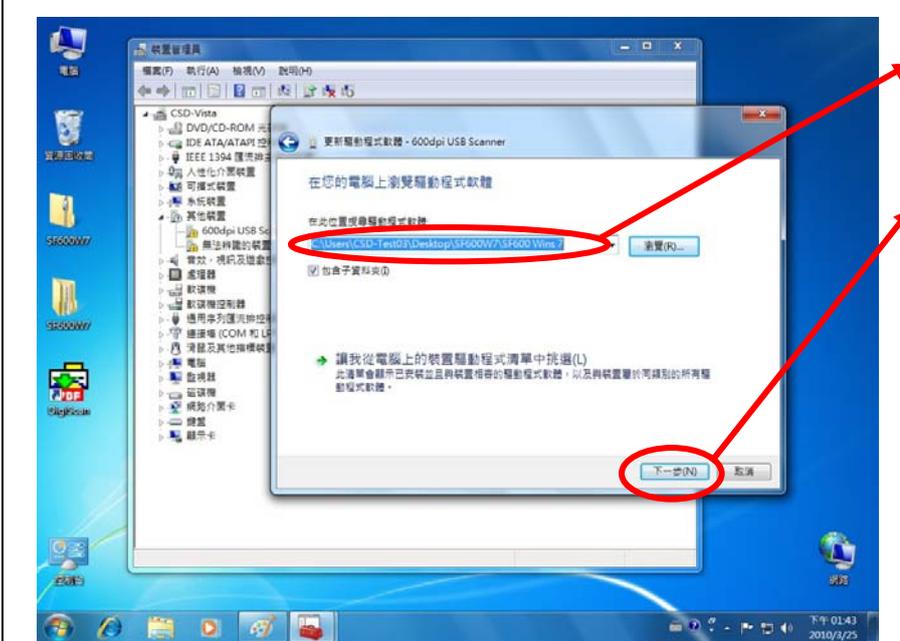

Step 19:

Find the driver folder of SF600. (Please refer to Step 5 to get the folder where you store the unzipped folder of SF600.)

And, if you store the unzipped SF600 driver file on Windows desktop, please indicate your system to this folder.

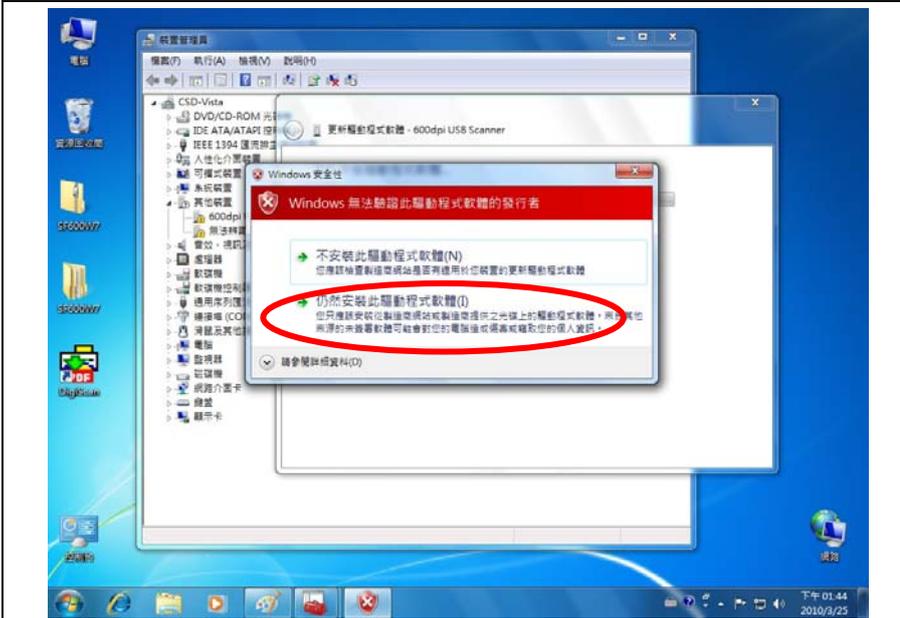

Then, click on “ok”.

Step 20:

Here is the path of the unzipped driver folder of SF600.

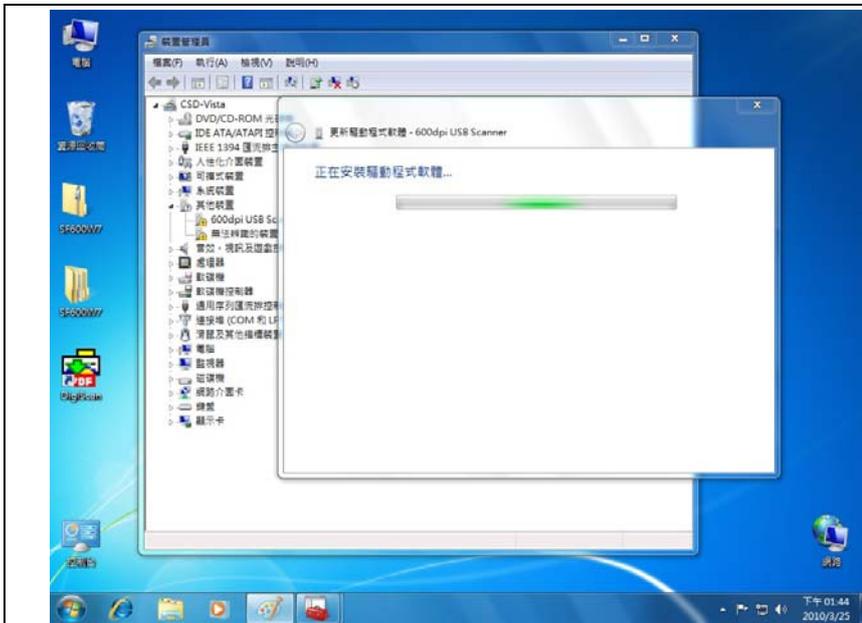

Please click on “Next”.

Step 21:

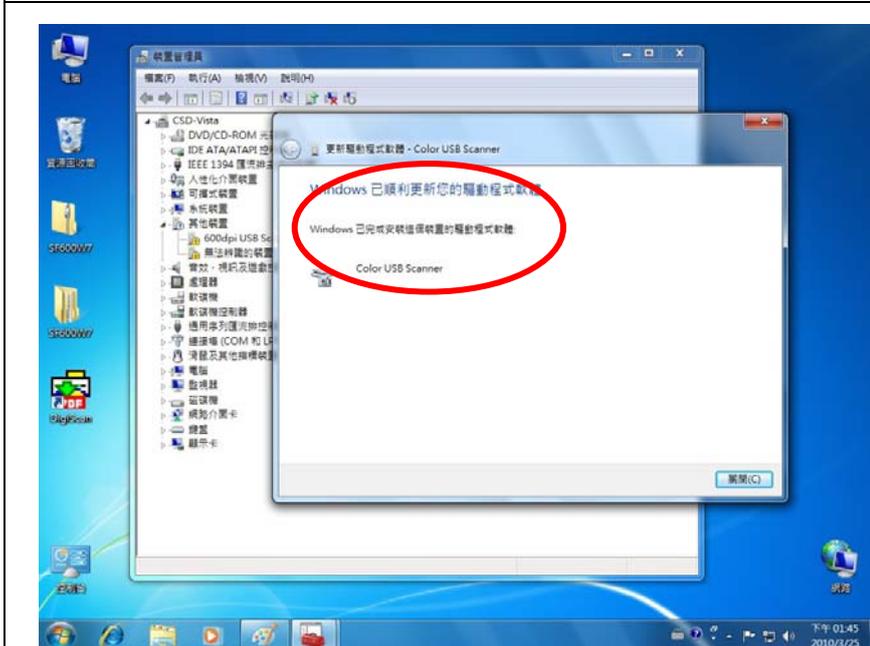

Windows may send you a warning message because it can't identify the driver provider.

Please choose to install the driver anyway.

Step 22:

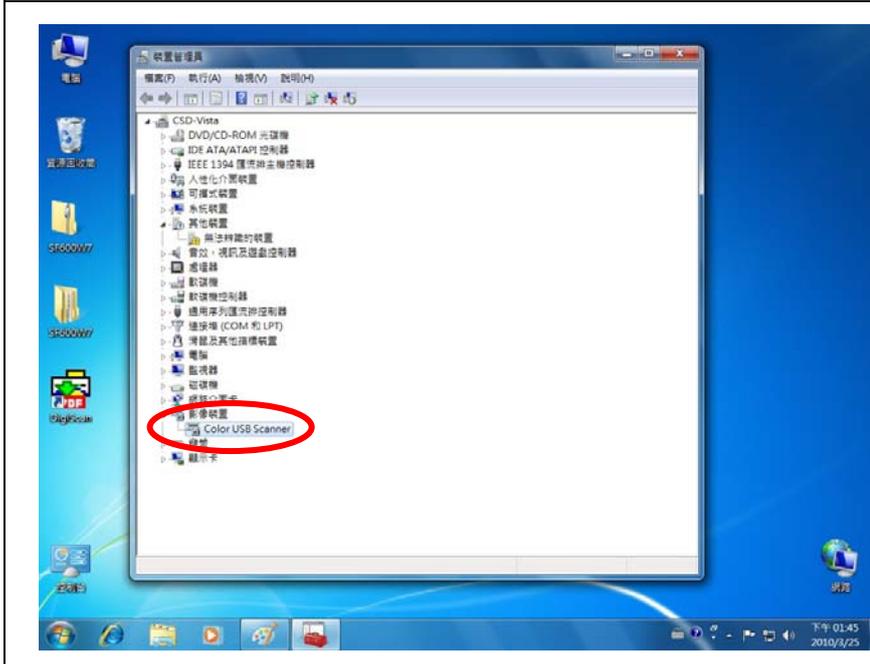

Wait for some more seconds to let your system find the driver and install it.

Step 23:

Windows 7 already install the SF600.

Please click on “Close” button.

Step 24:

If you open the Device Manager, you can see that SF600 is installed as “Color USB Scanner” in Windows 7.

And, it is listed under image device.
