

Pairing, operating, and charging

You must first pair the Bluetooth keyboard with the iPad before you can use it.

1. Turn the keyboard power on, then press the pairing button when the blue LED is lit.

2. In iPad setting, select General → Bluetooth, and turn Bluetooth on.

3. Select "keyboard" and if prompted, you may have to enter a pass key or PIN number. The Bluetooth feature will give you a pass key or PIN number so you enter that number.

4. When in use, the LED indicator will display the following colors:
 Blue: Bluetooth pairing status
 Red: Battery low
 Amber: Charging status

5. If the battery low LED is lit, you must charge the battery using the Micro USB power cable with your computer.
 - It is possible the battery in the keyboard may have lost power during shipping. We recommend you should charge it for at least three hours until the battery is full.
