

Mouse Re-pairing Steps:

Pairing Procedure

1. Turn the switch on and check the LED light works, then turn off the switch.
2. Plug the receiver into USB port, wait about 2 seconds until laptop recognize the receiver.
3. Press the Middle Scroll & Right Button at the same time in 10 seconds, and keep pressing for 5 seconds after turn on the switch, the receiver and mouse will be connected automatically. (For mouse and receiver pairing procedure, do this within 5 cm distance)
4. Move your mouse, if mouse works means that you pair it successfully.

*Please repeat the procedures from step three to step four in 10 seconds; otherwise you need to pair it again from step three to step four.

*It could be the operation mistake in process, try more times if you cannot pair it successfully.

Keyboard Re-pairing Steps:

1. Replug the receiver then finish Step 2 in 10 seconds.
2. Move keyboard closer to receiver, keeping press "ESC" and "Left Shift" together then put battery into keyboard at the same time. The process time should not less than 5 seconds.
3. If you can type words, it means that you re-pairing keyboard successfully.

PS: Below is US layout keyboard. If you use other language keyboard, the buttons you need to press are the same position as it.
